

When the illusory of the ego diminishes: You realise your connection with every thing, on the Earth, in the Solar system and ultimately, the multi-dimensional Universe.

To enter the Kingdom of spacetime is to become still, silent, just an alert awareness, the realisation that all forms in what appears as the external world are transparent, an empty fullness, the pressure of creative life seeking to be consciously known within you..

Void and existence coexist and complement each other endlessly in the Cosmos, and beyond this duality is Consciousness of unity.

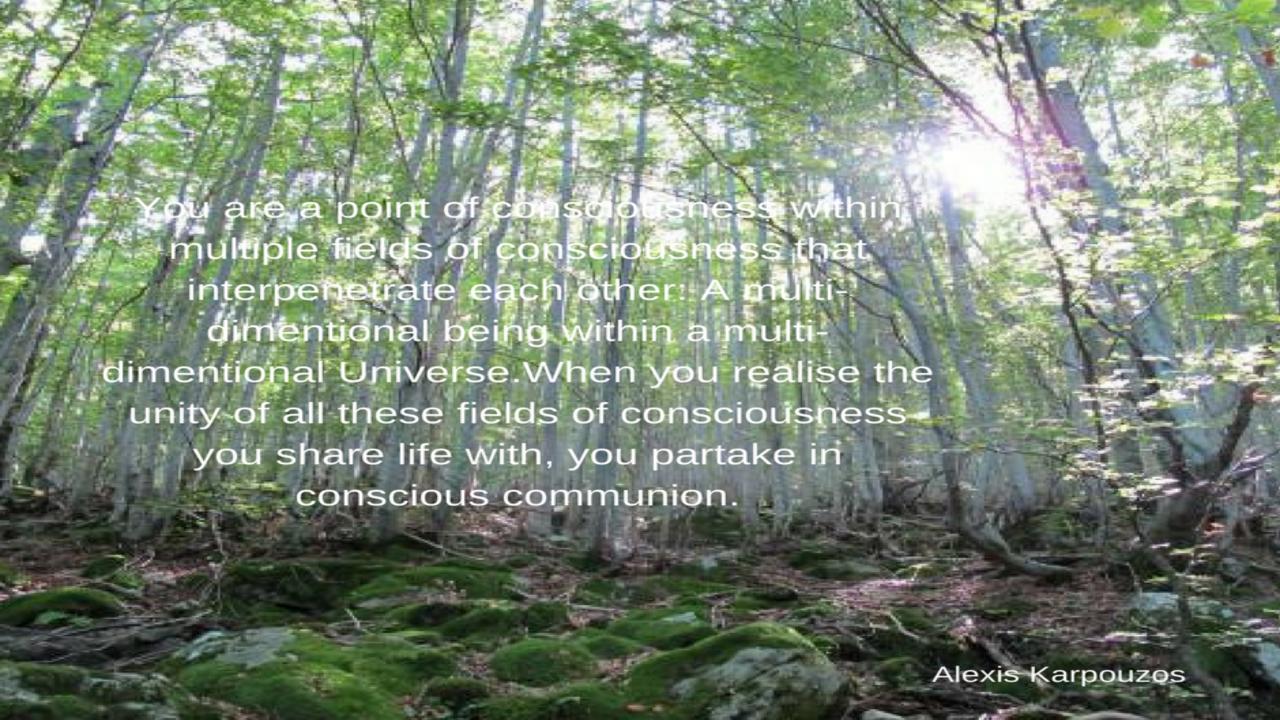

## Life and dead are one inseparable process in the Universe.

Alexis Karpouzos

Nothing éver exists entirely alone: everything is in relation to everything else.

Alexis Karpouzos

We are evolving toward unity consciousness where we experience ourselves as cosmic beings participating in the evolution of the universe. Awakening to this cosmic dimension of ourselves is profoundly restorative Alexis Karpouzos

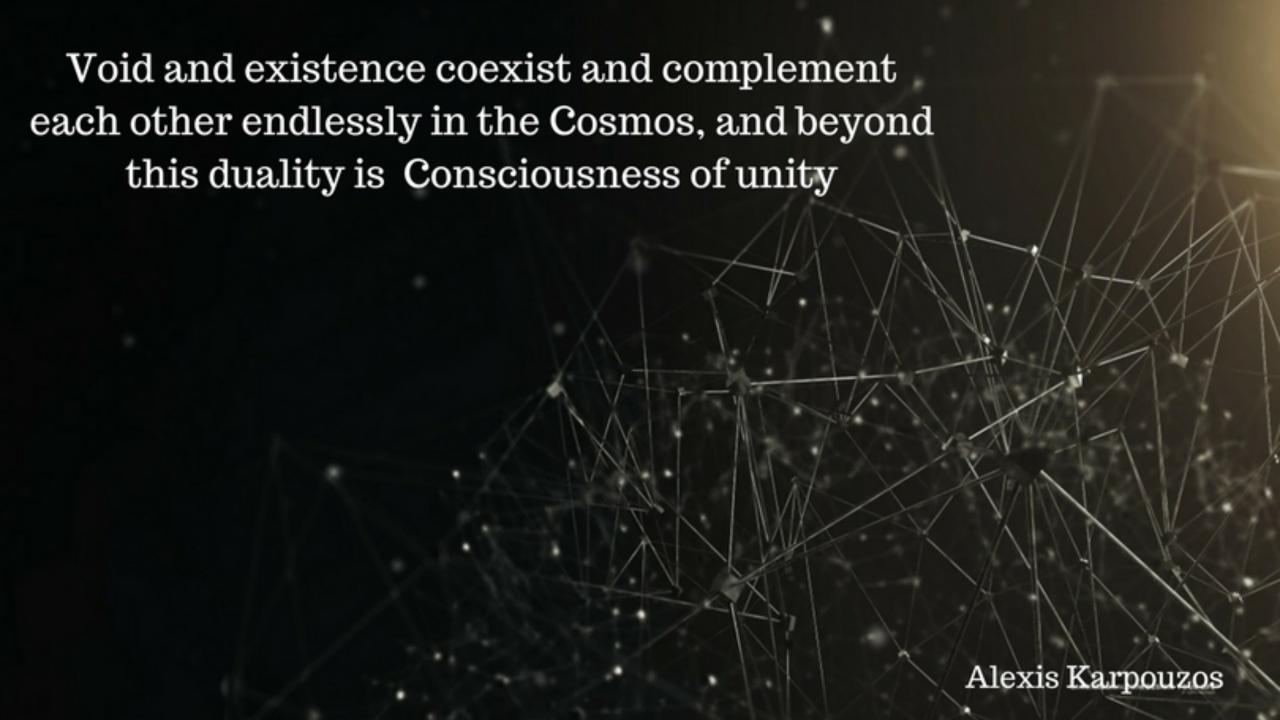

Beyond loneliness and massification, beyond the compulsion of property and possession and past the delirium of domination, may we be receptive and available to the unexpected, may we stay focused on the impossible!

## "The physical world and mental experience are two aspects of the same Cosmos"

"The source of all matter and energy is a vacuum, a nothingness that contains all the possibilities of everything that has ever existed or could exist."

"The random transforms into necessity through continuous selection"

## "Inspiration is the Elimination of Limitation" Alexis Karpouzos

Love is the source, the invisible force, the silent start talking in whispers.

## CONSCIOUSNESS IS THE INTELLIGENCE OF THE SOUL

Alexis karpouzos

"The knowledge of the soul is knowledge of the universe" The body is the visible universe, \* the thought is the invisible universe,

consciousness is what connects them.

"The Universe explains the existence of Observers and the Observers explain the existence of Universe"

Transformation of thought is the realization of unity and mutual interdependence of all beings and things of the world. The experience that all beings and things, unseen, invisible and visible, are interrelated and inseparable, constitute different forms of single and multi-dimensional world.

THE RATIONAL EXPLANATION OF THE EXCERPTS AND THE INTUITIVE APPREHENSION OF THE WHOLENESS ARE REQUIRED TO COMBINE AND CREATE THE OPEN THOUGHT AND THE HOLISTIC KNOWLEDGE. THIS MEANS THAT THE MEASUREMENT SHOULD BE DEFINED BY THE "MEASURE", BUT THE RESPONSIBILITY FOR DETERMINING THE "MEASURE" DEPENDS ON THE MAN. THIS REQUIRES THAT MAN OVERCOMES THE ANTHROPOCENTRIC ARROGANCE AND THE NARCISSISTIC SELFISHNESS AND HE JOINS THE COSMIC WORLD IN A FRIENDLY AND CREATIVE MANNER.

"The universe is not a world of separate things and events but is a cosmos that is connected and coherent. The physical world and spiritual experience are both aspects of the same reality and man and the universe were one." Alexis Karpouzos

All beings and things, visible and invisible are interrelated and inseparable, are the same and different forms of open wholeness. The possibility of survival, passing through a generous and friendly relationship with the other man, with the other beings, the planet as a whole, the stars and the whole universe.

We are guests in a vacuum, another aspect of the full

"The transcendental field of Cosmos is the total of all the possibilities that can occur in any part of the universal space-time."

The vastness of the universe recalls the finite nature of existence and the limitless potential.

Alexis Karpouzos
